

# Important Information for West Virginia Flood Victims

**MonPower**<sup>®</sup>  
A FirstEnergy Company

**Customers whose homes and/or electrical equipment were damaged due to flooding are required to obtain an electrical inspection before their electrical service can be reconnected.** Floodwater can create serious fire hazards if electrical wiring and equipment have been submerged, and hidden electrical hazards are always a possibility. The inspection is necessary to ensure the safety of our customers.

**Due to the unprecedented flooding that recently occurred in parts of our West Virginia service area, Mon Power has decided to pay for the independent private electrical inspection required for the service restoration of our affected customers.**

Mon Power customers who require an electrical inspection will need to **contact a state-licensed inspector directly – a list of state-licensed inspectors can be found on the back of this handout. Please have the inspector reference Order 15030108 in their inspection.** The electrical inspectors will bill Mon Power directly instead of the customer. Once the inspection is completed, electrical inspectors should submit the electrical inspection form (cut-in card) to Mon Power as they typically do. *Customers who have already paid for the inspection should contact Mon Power regarding reimbursement.*

When you are ready to have your service reconnected, or if you have any questions, please call our customer contact center at 1-800-686-0022.
